

REMARKS

Claims 1-10 are pending.

Applicants amend claims 1 and 6 and respectfully request the Examiner to withdraw the prior art rejections in view of these changes. As discussed on page 6, paragraph 28 to page 8 paragraph 36 of the specification, the virtual handwriting plane is based on the tracked position change of the system body.

The Milner reference virtual handwriting plane is not based on three-dimensional track information obtained through tracking. In the Milner reference, the virtual handwriting plane is a fixed plane, while the applicant's invention is adaptive or based on the tracked position change of the system body.

Conclusion

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.

AMENDMENT UNDER 37 C.F.R. § 1.114(c)
